SAFEGUARD - Outboard Motor Propeller Guard

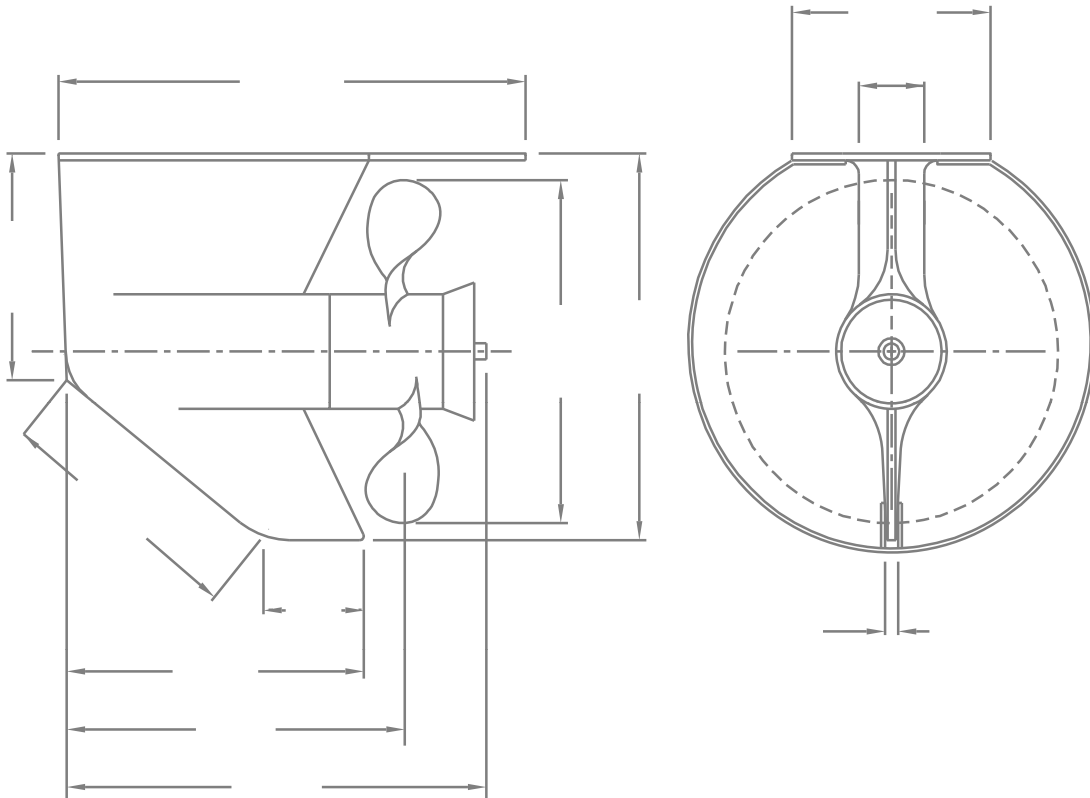

Thank you for your interest in our "Safeguard" Propeller Guard. Could you please fill in the dimension boxes as shown. Please use millimetres.

PESA Safeguards are manufactured from marine grade 316 Stainless Steel and are designed to be mounted underneath the cavitation plate and through the Skeg.

Therefore, the guard will be manufactured using the cavitation plate as the datum.

Using a spirit level can be a useful way to aid in taking the required dimensions for both the vertical and horizontal positions.

Please note that some Skegs may need the bottom bulb reduced in width by filling or grinding.

Manufacturers of precision sheet metal components, sub assemblies and fabrication.
 CNC TURRET PUNCHING, NC FOLDING 7 AXIS, HARD TOOL PRESS WORK, MANUAL PUNCHING
 AND FOLDING, WELDING-MIG TIG & SPOTWELDING, FASTENER INSERTION.
